

Jacobs' Team Experience – AS&M

Analytical Services & Materials, Inc. Overview

Analytical Services & Materials, Inc. is a woman-owned research and engineering firm specializing in advanced technologies. AS&M is a leading provider of highly technical services to the needs of the engineering and scientific community for over 20 years. AS&M's activities are primarily located in Hampton (VA) at NASA Langley Research Center, and Edwards (CA) at NASA Dryden Flight Research Center. AS&M offers advanced research and development services in aeronautical engineering, computational fluid dynamics, atmospheric sciences, structures, materials, software engineering & information technology. AS&M also offers custom built software for engineering and scientific applications. AS&M has a Specialty Coating Division that has developed innovative nano-composite and sol-gel coatings, AeroKret (formerly Aerocoat K) and Wearcoat, to mitigate erosion, corrosion, cavitation, weathering and wear. Additionally, they provide outreach support in several areas, including public affairs, communication and commercialization.
