

Overall Strategy Diagram

Creating your Sustainability Strategy is a circular process. You need to audit, develop objectives and plan, regularly review and measure success to ensure you keep improving.

Audit

Define sustainability issues, audit of current sustainability mitigations, benefits and limitations within the school. Pick 1-2 Themes to focus on each year.

Theme	Key Sustainability Issues	Current Sustainability Mitigations	Benefits From Current Mitigations	Limitations of Current Mitigations

Develop objectives that align with UN SDGs

Develop your sustainable school objectives that are aligned with the United Nations Sustainable Development Goals (SDGs). Develop your sustainable school objectives that are aligned with the United Nations Sustainable Development Goals (SDGs).

Theme	Key Sustainability Issues

TIP 1: develop key objectives, that will make a positive impact for your school, community and world, focus on outcomes that you want to achieve, understand what outputs will be delivered to achieve your outcomes.

TIP 2: align objectives with SDGs most relevant to your school, define how you as a school and as individuals can play a part in creating a sustainable future for all.

Plan and Implement

Identify what would you like to change, how are you going to do that, how you will measure your success and when you will assess progress within the school.

Theme	What you would like to improve	How you are going to do that	What implementation measures you will put in place	What key performance indicators you will use to measure success	When you will assess progress

Evaluate

Evaluate how successful your plan has been and what you can do to improve. Once you have completed this step go back to Slide 4 and create a new plan based on what you have learned.

Theme	What you did	Benefits	Disadvantages	Key Performance Indicators achieved	What you would do differently
