Jacobs

UNLOCK YOUR SAFETY POTENTIAL

Part 139 regulation requires certain certificated airports to develop and implement SMS*

SMS is a systematic and proactive approach that integrates safety into business management. It is the next step in the continuous cultivation of aviation safety by making risk-based and data-driven decisions to prevent accidents.
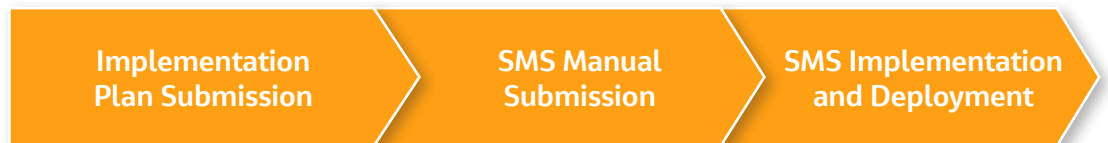

SAFETY MANAGEMENT SYSTEM (SMS)

› Implementation Plan
› Safety Manual

› Risk Assessments
› Training

› Mitigation Monitoring
› Safety Promotion

SAFETY RISK MANAGEMENT PANEL (SRMP)

› SRMP Prep & Technical Review
› Panelist & SME Coordination

› Facilitate SRMP
› Final Report & SAS-1 Form

UPCOMING FAA MILESTONES:

Implementation Plan Submission → SMS Manual Submission → SMS Implementation and Deployment

HELPFUL RESOURCES:

› FAA External SMS (SMS for Part 139 Airports)
› Title 14 CFR Part 139 Airport Safety Management System
› FAA Advisory Circular 150/5200-37A Safety Management Systems for Airports
› FAA Office of Airports Safety Management System (SMS) Desk Reference
